

Lynn Venghaus
Director of Market Expansion

SHAMROCK AIR SYSTEMS

Dear NAME,

I am writing to you to let you know that I have recently started my own home-based business. I am extremely excited about this new development because it will give me the flexibility I need, allow me to work from home and I'll be working with a top notch company that's leading the market in environmental products for home and business.

I've joined a 19 year old company by the name of EcoQuest International. I am an independent business owner. EcoQuest is all about "Healthy Living Technologies". Their mission is: ***"To enhance and improve the quality of living indoors by providing products which bring safety, convenience, and beauty into the spaces where people spend their lives and to provide a real life-changing opportunity for anyone willing to work."***

EcoQuest manufactures and markets air purification systems for residential and light commercial applications. They also market a line of partial and whole-home water purification systems. Other products include: dust mite resistant bedding, non-toxic household cleaning products, personal care and whole-food nutritional products. Please feel free to take a look at my EcoQuest website (www.ecoquestintl.com/shamrock429) to learn more.

What I am most excited about sharing with you NAME, is the effectiveness of EcoQuest's air purification technology. Our "space certified" Fresh Air by EcoQuest is absolutely unique in the industry. It employs the same technology used to scrub the air in NASA spacecraft.

After only 72 hours of using one of the Fresh Air purifiers, I noticed the following:

- There is a significant decrease in airborne particles floating around our house.
- There's been a noticeable decrease in the amount of sneezing going on.
- Our eyes don't burn and itch like they used to when we wake up in the morning.
- There is a lot less snoring going on during the night compared to before.

We were shocked by the results after only a few days. We are all sleeping much better at night.

Please help me help others. If you know of anyone that has any of the following issues, please send them my way:

- Breathing problems
- Allergies
- Pet odor problems in the home
- Mold or mildew problems
- Home/office air quality issues

I am looking for a few people to test the technology for me, so that I can put together some testimonials regarding the experiences with the products. I will provide an air purifier for a 3-5 day period of time. All I ask in return is honest feedback.

Thank you in advance for helping. I can be reached at either

Sincerely,
